## FBV MATCHING BONUS

Rwin Global has designed a unique incentive plan through which an Independent Business Owner (Distributor) can earn income by transacting in our exclusive product range.

An introductory or first purchase of these exclusive products generates special points known as First Business Volume (FBV) for the respective IBO.

To start earning Business Matching Incentives, an Independent Business Owner (Distributor) is required to build two organizations:

- The organization with higher business volume is called the Main Organization.
- The organization with lower business volume is called the Other Organization.

The Matching Bonus is calculated by comparing the business volume of both organizations. Any surplus volume is carried forward to the next cycle.

Under this plan, a Distributor can earn up to a maximum of **10% Matching Income\***.

The closing period will be from Monday to Sunday and payouts for FBV income will be transferred every Thursday.
